Product Discontinuation Notice

Dear Valued Customer,

This Discontinuation Notice informs that DREAM SAS is now discontinuing the production of its Audio DSP products **SAM2634, SAM2635, SAM2653, SAM2655** and **SAM2695**.

The SAM26xx series is in Mass Production since 2014. In last years, the activity for the listed products has declined to a level that makes manufacturing operations more complicated to manage however all these chips can still be supplied by the factory.

This Discontinuation Notice informs you that you can adjust your product purchasing records and place final LTB orders accordingly.

Replacement products are SAM5704 and SAM5504, DREAM will support its customers to migrate SAM26xx based solutions to the SAM5000 platform when it is not yet already done.

Last date for placing the Last Time Buy (LTB) orders: 30th June, 2025

Last date for delivering the discontinued products: 30th December, 2025

DREAM SAS will consider this notice fully noticed and approved unless specific conditions of acceptance are provided in writing to our local sales before the last date for placing the LTB orders shown above. All accepted orders will be supported on the non-cancellable and non-returnable (NCNR) condition except the cases related to quality issues.

For additional information or questions regarding this product discontinuation, please contact our local distributor or DREAM directly.

Thanks for your trust in DREAM
Best regards,

Philippe Lorent
CEO - DREAM SAS
